

# REQUEST FOR PROPOSALS

## *Long Island Sound Futures Fund*

The Long Island Sound Study, in partnership with the National Fish and Wildlife Foundation, are pleased to announce a Request for Proposals for approximately \$3 million under the 2010 Long Island Sound Futures Fund (Sound Futures Fund). This year the Sound Futures Fund will emphasize implementation projects focused on protecting and restoring Long Island Sound, particularly projects that: restore and protect important fish and wildlife habitats; and implement locally-based projects that improve water quality and protect water resources. There is also funding for acquisition projects.

New applicants and past grantees please note there will be a remote webinar associated with the grant program. Please consider joining us at the webinar. We will be discussing the extensively revised request for proposals and providing tips for making the process of online proposal preparation easier.
