

Peconic Estuary Partnership

PROTECTING AND RESTORING LONG ISLAND'S PECONIC BAYS

Sag Harbor Stormwater Control Project

PEP is allocating \$190,000 of BIL funds toward this stormwater control project

Background:

Sag Harbor Village sits on the north shore of the South Fork, split between the Town of Southampton and East Hampton. With a large tourism economy and bustling marinas, clean water is very important. Unfortunately, due to issues such as stormwater runoff, water quality has been affected and local beaches have been closed to swimming.

Sag Harbor Stormwater Control Project:

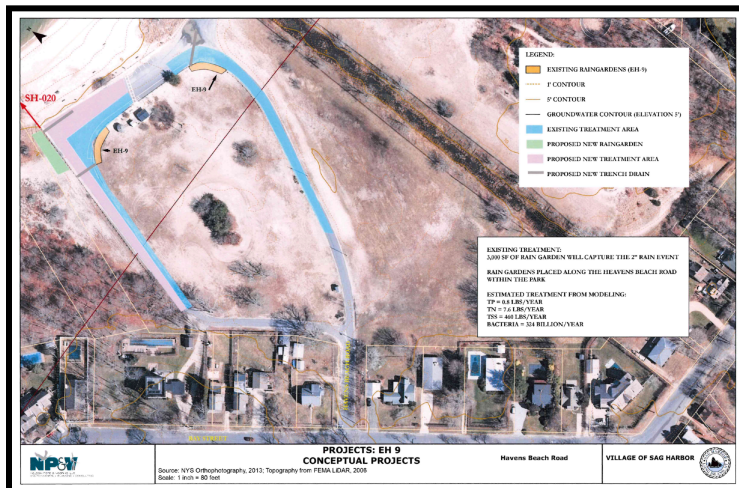

This project will provide stormwater remediation in Sag Harbor Cove and Havens Beach with four green infrastructure installations. These will manage stormwater and filter pollutants before the water reaches Sag Harbor Bay. The project area is a NYS designated environmental justice area.

The goals of the project include:

- Improve water quality
- Increase coastal resilience in an area prone to flooding and experiencing increased precipitation
- Provide education to the local community about climate change, coastal adaptation, and stormwater management using green infrastructure

Havens Beach Rain Garden

This site will include rain gardens, road amendments for increased stormwater capacity

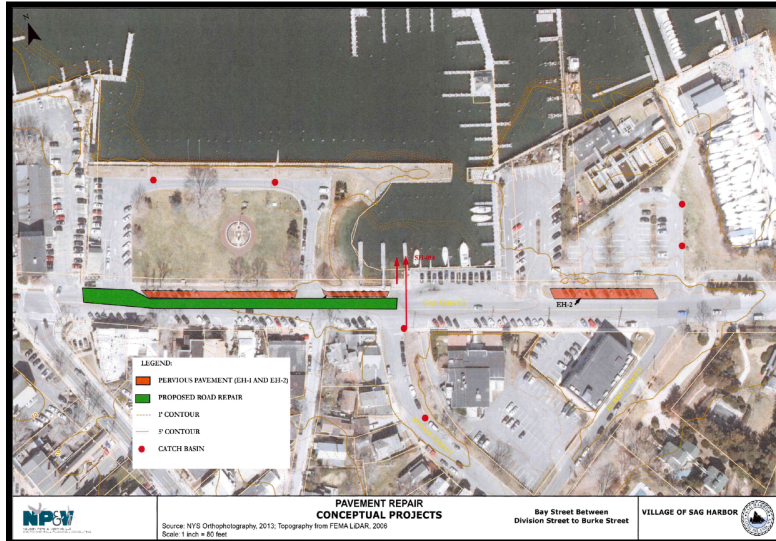

Peconic Estuary Partnership

PROTECTING AND RESTORING LONG ISLAND'S PECONIC BAYS

Bay Street Pervious Pavement

This site will include re-grading and amendments using pervious pavement.

CCMP Actions:

Action 14: Increased public awareness of anticipated impacts of Climate Change in the Peconic Estuary and practical ways to mitigate and prepare for them.

Action 21: Expand non-point source subwatershed management plans to all pathogen-impaired waterbodies and continue to use existing plans.

Status:

In-Process

Secured Funding:

PEP Bipartisan Infrastructure Law Y1 Funds: \$190,000

Partners:

Village of Sag Harbor

Village of North Haven
